

Course Catalog

2009 Manual on Uniform Traffic Control Devices (MUTCD) for Technicians

This one-day course provides an introductory overview of the 2009 edition of the MUTCD, with emphasis on MUTCD applications related to work zones (temporary signing). The course also will provide an overview of sign retroreflectivity assessment and management methods and an introduction to guidelines for Incident Management (emergency temporary traffic control). This course is intended for local traffic/highway technicians.

Work Zone Signing (Temporary Traffic Control)

This half-day course covers Part 6 of the 2009 Manual on Uniform Traffic Control Devices. It is directed to personnel actually implementing traffic control in work zones. Topics covered are the uses of channelizing devices, barricades, warning lights and proper sign placement.

Bicycle and Pedestrian Facilities/Traffic Calming: Safety Perspective

This half-day course is directed at local professional staff with responsibilities for the planning, design and operation of bicycle and pedestrian facilities. The course also provides an introduction to residential traffic calming strategies and ADA requirements.

Traffic Engineering Topics for Technicians and Engineers

This one-day course provides basic instruction in selected traffic engineering topics such as speed studies, sight distance, traffic safety studies, traffic volume studies, pedestrian facilities and roadside design. The course is appropriate for persons with an engineering background who have little or no training in traffic engineering.

Design and Maintenance of Very Low-Volume Roads

This course provides training in the application of the material in AASHTO's 2001 Guidelines for Geometric Design of Very Low-Volume Local Roads. This is a one-day course directed at professional engineering staff with responsibilities for the design of low volume (ADT less than 400 veh/day) local roads.

Use of Traffic Control Devices to Improve Safety

This one-day course is based on the "Low Cost Safety Improvements" course developed by the FHWA Resource Center. The course describes the specific safety benefits associated with the application of certain traffic control devices and roadside treatments. The course is directed at local traffic/highway professionals and technicians.

MUTCD for Emergency Response Personnel

This half-day course is intended for personnel with responsibilities for implementing "incident management" traffic control measures. The course covers Section 6-1 (Traffic Incident Management) of the 2009 MUTCD. Personnel with an interest in this course should also consider attending the "MUTCD for Technicians" Course.

On-Demand/On-Site Course Offerings

In addition to the scheduled program of course offerings, the courses listed above are available "on-demand" to state and local agencies in Kansas. On-demand courses require a minimum class size of five students and will be delivered at a location and date determined by the agency requesting the course(s). Requests for on-site courses must be made at least six-weeks in advance of the anticipated date(s) of the course(s).

Refunds/Cancellations

If you must cancel your registration, please do so by at least one week prior to the session. Substitutions are accepted. Registration fees, less a \$5.00 processing fee, will be refunded if notice is received in the conference registration office by one week prior to the session. To modify or cancel your registration, please send a written request to registration@k-state.edu with the subject line "TASK." Due to guarantees we must give prior to the conference, refunds are not available after refund deadline. Refunds cannot be given in amounts less than \$5. Registered participants who do not cancel their registration in writing by refund deadline are responsible for the total registration fee even if they do not attend the training and have not paid the registration fee.

Kansas State University may cancel or postpone this program because of insufficient enrollment or other unforeseen circumstances. If the program is canceled or postponed, registration fees will be refunded but we cannot be held responsible for other costs, charges, or expenses, including cancellation/change charges assessed by airlines or travel agencies. Registration fees will not be canceled and refunds will not be issued if the program is held but the registrant is unable to attend due to travel delays or cancellations caused by inclement weather, or due to other extraordinary circumstances beyond the control of Kansas State University.
